THE Korean correspondent of the Japan Mail writing from Soul says that cholera has fairly established itself in the city, and is carrying off hundreds of the ichabitants daily. We can conceive no conditions more favourable to the apread of the disease than those which exist in a Korean city, with its universal and revolting filth and its utter lack of sanitation. No estimate is said to be possible of the number of deaths occurring in Soul. The physicians at the Royal Hospital suggested that some steps to obtain statistics might be taken with advantage. but report says that the authorities could not be brought to appreciate the use of counting dead men. No doubt there is much alarm, among hoth official and non-official classes. But the result of the feeling is merely to prepare victims for the plague, not to inspire efforts to check its ravages.

THE keen interest which the present Commander-in-Chief in India is known to have in musketry (says the Pioneer) should stimulate every soldier in India to shoot straight! and make every Commanding Officer eager to see his regiment high up on the list in the Musketry Returns. But Sir. Frederick Roberts is not a man of precept only: he practises what he preaches. The recent rifle matches at Simla have proved this, and the published scores should show the Army that their Chief is one of the crack-shots in India 1 59 out of a possible 70 on one occasion and 57 out of 70 on a second are scores which would hold their own at Wimbledon; and we doubt not typhoon. The baremeter then stood at that the merit of the shooting will be appreciated in every barrack room in which it
